## CRIA BOOST

An oral paste to stimulate growth,  
immunity and health in crias

## Why should we use AgriCure CRIA BOOST?

### 1. What is AgriCure CRIA BOOST?

AgriCure CRIA BOOST is an oral paste, helping to support growth, immunity and health in crias. CRIA BOOST is a micro nutrient paste formulated specifically for new born crias and crias at times of stress, to support:

- Activity
- Appetite
- The emerging immune system
- Growth rates

### 2. What are some of the benefits you may see from using AgriCure CRIA BOOST?

When using AgriCure CRIA BOOST, you may see:

- Increased appetite in the new born cria; when fed immediately after birth CRIA BOOST helps to stimulate appetite in the cria ensuring good colostrum intake
- Increased activity in the new born cria; when fed immediately after birth CRIA BOOST will help to boost the crias activity in the first few hours of life, helping it to get up and suck quicker, gaining the needed colostrum
- A healthier cria

### 3. What does AgriCure CRIA BOOST contain?

AgriCure CRIA BOOST is formulated from a high concentration of:

- Omega 3
- Prebiotic
- Vitamins (B1, B2, B6, B12, E, D3 and A)
- Trace elements
- Glucose

### 4. When should AgriCure CRIA BOOST be fed?

AgriCure CRIA BOOST should be fed 6ml per cria (30ml paste = 5 doses):

- Immediately after birth to any cria
- 5 days after birth (if necessary to give further boost)
- Bought in crias when they first arrive in the yard
- To crias recovering from diarrhoea

## Advantages and Benefits

### Active ingredients in CRIA BOOST

Active Ingredient	Function
Vitamins B1, B2, B6, B12	Used to help regulate body temperature in new born crias.
Omega 3	Widely recognised to be anti-inflammatory and may improve the survival of septicemic crias.
Prebiotic	Provides nourishment for the good bacteria to assist in maintaining good digestion and nutrient release.
Garlic	Excellent appetite stimulant.
Rosemary & Oregano	Natural anti-inflammatory and anti-oxidant properties.
Seaweed Extract	Helps to stimulate immunity and gut response.
Glucose	Energy source for crias, which is essential in first few hours.

#### Instructions For Proper use:

Feed 6ml to the back of the tongue within the first 12 hours of birth. Can be repeated after 5 days if necessary. Complementary feedingstuff for crias.

#### Storage Conditions/Precautions:

Keep out of the reach of children.  
For oral animal use only. **DO NOT FEED TO SHEEP**  
Storage Conditions: Store in original container below 25°C. Keep out of direct sunlight. Do not freeze.
