# BIMODEX

**lodophor disinfectant** 

DATA SHEET

### **USES**

This disinfectant product has been approved for disinfection of inanimate surfaces where an approved product is required to be used under the control legislation for the following specific disease(s) orders:

- **Foot-and-mouth disease** at the dilution rate of one part of this preparation plus 550 parts of water
- **Poultry diseases** including avian influenza, influenza of avian origin in mammals, Newcastle disease, paramyxovirus at a dilution rate of one part of this preparation plus 100 parts of water
- **Swine vesicular disease** at the dilution rate of one part of this preparation plus 100 parts of water
- **Tuberculosis disease** at a dilution rate of one part of this preparation plus 20 parts of water

LIST No	UNIT PACKAGE	CASE SIZE	
1BIM220	5L	1	

See reverse for Usage Instructions

## **BENEFITS**

- Quickly kills bacteria, viruses and fungi
- Cleans and disinfects in one operation
- Active in the presence of organic matter

# **Bimodex**

# **lodophor disinfectant**

#### **DIRECTIONS FOR USE**

**Bimodex** is a fast acting and powerful iodophor based detergent sanitiser and disinfectant. It is effective against a wide range of bacteria, fungi and viruses. **Bimodex** contains a powerful detergent allowing it to clean and disinfect in one operation.

#### LIVESTOCK PROTECTION

**GENERAL CLEANING AND DISINFECTION** – when using in livestock housing remove all portable equipment, litter and manure. Apply disinfectant after adjusting the dilution to suit soil level and/or disease specific history of the house – i.e. between one part **Bimodex** to between <u>100</u> and <u>550</u> parts water. Allow the area to dry if possible before replacing equipment and restocking. Also use a solution of **Bimodex** to treat buckets, cages, hatchery trays, drinkers, crates and other non-porous surfaces.

WHEEL AND FOOTBATHS - use at a dilution of 1:90 and renew daily.

**AERIAL DISINFECTION** – apply at a suitable dilution rate through a mist generator.

**DRINKING WATER SYSTEM** – drain the system and flush with clean water before using a suitable dilution of **Bimodex** to disinfect the system. Allow contact time of 30 minutes before rinsing with clean water to remove all traces of disinfectant.

#### **OTHER USES**

**Bimodex** is a powerful and versatile detergent disinfectant, which may be used for a variety of applications in animal husbandry. Follow the Defra Approved dilutions as shown on this label and if used for PRRS (Blue Ear Disease) dilution 1:200 with water.

**FISH NETS, HOLDING TANKS AND CRATES** - use **Bimodex** at a dilution of 1:100 to prevent the spread of disease in ponds and fisheries.

For full details see Bimodex MICROBIOLOGICAL PROFILE.

**Bimodex** may be used on farm dairies for sanitising equipment and farm bulk milk tanks when diluted 1:400.

Further information on specific uses and dilutions is available on request.

This disinfectant product has been approved for disinfection of inanimate surfaces where an approved product is required to be used under the control legislation for the following specific disease(s) orders;

- Foot-and-mouth disease at the dilution rate of one part of this preparation plus 550 parts of water;
- **Swine vesicular disease** at the dilution rate of one part of this preparation plus 100 parts of water;
- **Poultry diseases** including avian influenza, influenza of avian origin in mammals, Newcastle disease, paramyxovirus at a dilution rate of one part of this preparation plus 100 parts of water;
- **Tuberculosis disease** at a dilution rate of one part of this preparation plus 20 parts of water;

This disinfectant product has also been approved at a dilution of 1 part of this preparation plus 90 parts water for disinfection of inanimate surfaces where General Orders require the use of an approved disinfectant.

This Approval is granted under the Diseases of Animals (Approved Disinfectants) Orders made by the Secretary of State for Environment, Food and Rural Affairs in England, Scottish ministers in Scotland and Welsh ministers in Wales. For confirmation of continuing approval refer to the Defra list of approved disinfectants at http://disinfectants.defra.gov.uk

The contents of this container are guaranteed by the manufacturer to be of the same composition and quality as the sample submitted for approval testing.

This preparation has been approved by the Department of Agriculture, Environment and Rural Affairs as a disinfectant for the purposes of the Diseases of Animals (Approval of Disinfectants) Order (Northern Ireland) 1972 as amended for use against the diseases specified above, at the dilution rates stated.

This preparation has been approved by the Minister for Agriculture, Food and the Marine, Dublin, Ireland.

**Approved Uses and Dilution Rates Foot and Mouth Disease**: 1 part of this preparation to 550 parts of water.

**Swine Vesicular Disease**: 1 part of this preparation to 100 parts of water.

**Avian Influenza & Newcastle Disease**: 1 part of this preparation to 100 parts of water.

**Tuberculosis:** 1 part of this preparation to 20 parts of water.

\*Other Scheduled Diseases: 1 part of this preparation to 90 parts of water.

The contents of this container are the same quality and composition as approved by the Minister for Agriculture, Food and the Marine, Dublin, Ireland.

#### **PLEASE NOTE**

Disinfectant dilution rates for effectiveness relate to use on a clean surface. (a) thoroughly cleansed, ensuring the dung, litter, etc. is removed and disposed of so there is no risk of contact with livestock; and (b) (the clean surface) washed or sprayed with an approved disinfectant used at the approved dilution rate

\*Other Scheduled Diseases refers to other Scheduled Diseases under the Animal Health and Welfare Act 2013.

**Bimodex** contains Sulphuric Acid 9.3% w/w, Phosphoric Acid 9.5% w/w and Minimum available lodine 2.75% w/w at time of manufacture.

#### **ENVIRONMENTAL INFORMATION**

Bimodex	Contains amongst other ingredients
15% or over but less than 30% 5% or over but less than 15%	Nonionic Surfactant Phosphate (Phosphoric Acid)
	Disinfectant (lodine)
