

Four stroke method for application of CliK and CliKzin

Many farmers prefer to apply CLiK and CLiKZiN in this way.

To ensure an accurate spread, apply the total required dose one quarter at a time.

1. $\frac{1}{4}$ of dose from mid shoulders to middle of back
2. $\frac{1}{4}$ of dose from middle of back to top of tail
3. $\frac{1}{4}$ of dose to one side of animal's tail and crutch
4. $\frac{1}{4}$ of dose to other side of animal's tail and crutch

Always use the correct Novartis Animal Health pour-on gun with the correct nozzle for individual product application. All applicators available from Farmacy.
