

Technical Data Sheet

Healthy Hooves® HH 103 Ultimate

Product description: **Healthy Hooves®** Ultimate contains Copper Sulphate and Zinc Sulphate and the unique patented chelant that produces a predictably higher sustainable concentration of hydrogen ions. These sustainable ions bond (chelate) the Copper ion (Cu⁺⁺) and Zinc ion (Zn⁺⁺) to keep it in suspension, preventing Copper/Zinc precipitation. **Healthy Hooves®** Ultimate was developed for use in automatic footbaths and spray systems where it is impractical to make up solutions prior to use.

Benefits:

- Sustains active Copper and Zinc ion levels.
- Safe to use for both the operator and the environment.
- No need to mix Copper Sulphate or Zinc Sulphate.
- Reduction in Copper and Zinc Sulphates in the slurry.
- Suitable for use in a wide range of automatic footbath and spray applications.

Properties:

Form:	Liquid
Specific Gravity:	1.16
Colour: Clear:	Blue
Odour:	Faint
Solubility:	Complete in Water
PH (Neat):	<1.0
PH 1% in solution H ² O:	2.0 - 3.0

Directions for use: **Healthy Hooves®** Ultimate is used at 2% by volume. Additional Copper Sulphate and/or Zinc Sulphate can be added to the solution.

Statement of use: **Healthy Hooves®** Ultimate should be used as follows for the best results:

- ❖ Footbath twice daily, five days per week, for three weeks.
- ❖ Followed by twice daily, three days per week, thereafter.
