

Technical Data Sheet

Healthy Hooves® HH 108 Eco™

Product description: **Healthy Hooves® Eco™** contains a unique patented chelant that produces a predictably higher sustainable concentration of hydrogen ions. These sustainable ions bond (chelate) the Zinc ion (Zn^{++}) to keep it in suspension, preventing Zinc precipitation. Proven in field-trials on farms, **Healthy Hooves® Eco™** has shown to provide a consistently effective footbath life throughout the processing of up to 800 ewes per 100 litre footbath.

Benefits:

- Sustains active Zinc ion levels.
- Excellent antiseptic properties.
- Safe to use for both the operator and the environment.
- Zinc Sulphate quickly disperses into the solution.
- Reduces Zinc disposal.

Properties:

Form:	Liquid
Specific Gravity:	1.035
Colour:	Blue
Odour:	Faint
Solubility:	Complete in Water
PH (Neat):	<2.0

Directions for use:

Healthy Hooves® Eco™ is used at between 4% & 2 % by volume. A typical dilution is (2 litres **Healthy Hooves® Eco™** with 100 litres of water). A 2% dilution allows a predictable level of Zinc ion (Zn^{2+}) to be active and sustained in solution. Add 1% Zinc Sulphate to the footbath as a separate product (up to 800 ewes per 100 litre footbath).

Statement of use:

Healthy Hooves® Eco™ should be used as follows for the best results:

- ❖ **Initial Use** – Use **Healthy Hooves® Eco™** at 4% with 1% Zinc Sulphate, footbath for 4 consecutive days.
- ❖ **Ongoing Use** – Use **Healthy Hooves® Eco™** at 2% with 1% Zinc Sulphate, footbath as required.
- ❖ **Spray Application** – Use **Healthy Hooves® Eco™** at 4% with 1% Zinc Sulphate, apply daily as required.
